2021 Census – Indigenous Data Release

Overview of key analytical products for the Indigenous data release

Release day: September 21, 2022

- Daily article: Indigenous Peoples in Canada: Findings from the 2021 Census

October 2022

- Census in Brief: Métis in Canada: Signatories of the Canada-Métis Nation Accord and Métis Settlements
- Census in Brief: Housing conditions among First Nations people, Métis and Inuit in Canada
- Census in Brief: Indigenous languages in Canada

Spring/Summer 2023

- Insights on Canadian Society: Educational attainment, school enrollment and labour market outcomes among Indigenous people in Canada

RELEASE: 2021 Census 'Language'

The 2021 Census Dissemination Project is pleased to announce the official release of the 2021 Census 'Language' information.

[Analytical products](#) offers links to *The Daily* article and two infographics.

- [While English and French are still the main languages spoken in Canada, the country's linguistic diversity continues to grow](#)
- [Increasing diversity of languages, other than English or French, spoken at home \(Infographic\)](#)
- [More than one language in the bag: The rate of English-French bilingualism is increasing in Quebec and decreasing outside Quebec \(Infographic\)](#)

[Census learning centre](#) contains a collection of short videos to help users of census products better understand the various Census of Population concepts. There will be two additional videos added to the Census learning centre on the topic of 'Language':

- [Mother tongue, 2021 Census of Population](#)
- [Knowledge of official and non-official languages, 2021 Census of Population.](#)

Using new and existing data for official statistics

Statistics Canada provides researchers and policy makers with insight into our society and economy for the benefit of all Canadians; helping to answer questions and provide decision makers with the right information about complex issues that affect us all.

We collect data directly through traditional means such as by paper, by telephone, in person, but also through online and crowdsourcing surveys.

Statistics Canada has also been using existing data sources in official statistics for about 100 years. Today, many of our programs use existing data from government agencies and private sector organizations; which are collected as part of their ongoing operations. Statistics Canada integrates these data into official statistics to meet statistical and research requirements.

Learn more at [Using new and existing data for official statistics \(statcan.gc.ca\)](https://www150.statcan.gc.ca/n1/pub/26-263-x/202208-eng.htm).

The International Study of Adults is now underway!

The International Study of Adults (ISA), an initiative of the Organisation for Economic Co-operation and Development (OECD), aims to gain insight into the skills and competencies of adults aged 16 to 65 years in 32 participating countries. In Canada, the ISA is conducted by Statistics Canada in partnership with Employment and Social Development Canada (ESDC) and the Council of Ministers of Education Canada (CMEC).

From September 2, 2022, to April 30, 2023, Statistics Canada interviewers will contact households selected to participate in the ISA. A letter has been sent to these households to explain the interview process and the importance of participating in this voluntary study.

The purpose of the survey

The [ISA](#) will collect new data on the abilities and experiences of adults in Canada by learning about their various everyday activities, such as reading, finding information, using computers and technology, as well as their education and work experience. As in the [previous cycle of the ISA in 2012](#), some off reserve Indigenous households were selected to participate in the second cycle of the study in order to have up-to-date and relevant data. These data will shed light on issues that are important to Indigenous peoples, such as health, education, and social programs.

Your participation is important

The results from this study will help educators as well as education policymakers and researchers offer programs that will benefit communities. The ISA will provide more information on the numeracy and literacy skills of populations. These skills are important for finding a job, receiving good health care, prolonging life expectancy and contributing to the community.

In addition, your participation will help ensure Canada is:

- preparing for future learning demands
- providing the skills Canadians need to succeed at work and in everyday life
- shaping a new path for technological advancement
- understanding how the adult population is faring compared with other countries.

Your information will remain confidential

All information collected by Statistics Canada is strictly confidential and is protected by the Statistics Act. Statistics Canada cannot release any information that would identify you or any member of your household without your consent. For more information on how your privacy is a top priority, please visit www.statcan.gc.ca/en/trust.

The next major 2021 Census of Population release

Statistics Canada has started releasing [2021 Census of Population results](#), and is set to release data on October 26, 2022:

- Immigration, place of birth, and citizenship
- Ethnocultural and religious diversity
- Mobility and migration
