The 2022 Indigenous Peoples Survey is happening now!

Between **May and October 2022**, Statistics Canada is conducting the [Indigenous Peoples Survey \(IPS\)](#) across Canada. The survey is secure and confidential.

Individuals have been randomly chosen from those living **off reserve** aged 1 and older who identified themselves as Indigenous or as having Indigenous ancestry in the 2021 Census of Population. A letter was mailed to those chosen for participation in the IPS. Online completion of the survey is encouraged, and Statistics Canada interviewers will also be connecting with respondents either in person or over the phone.

Looking for more information?

Check out the [Indigenous Peoples Survey Supporter Toolkit](#). The kit has images, information, links and a video, so anyone can help spread the word about the IPS!

NOTE: The IPS is a national survey of First Nations people living off reserve, Métis and Inuit aged 15 years and older

Honouring History, Heritage and Diversity: Spotlight on National Indigenous History Month

National Indigenous History Month in Canada is an opportunity to recognize and honour the history, heritage and diversity of First Nations peoples, Inuit and Métis in Canada, and all of their contributions - past and present.

Statistics Canada encourages all Canadians to take time in June—especially on June 21 National Indigenous Peoples Day—to learn about and experience the many languages, cultures and immeasurable contributions of First Nations peoples, Inuit and Métis.

Resources on Indigenous Peoples

To mark National Indigenous History Month, we would like to highlight information on Indigenous Peoples that you can access through the [Statistics on Indigenous Peoples hub](#).

About the Newsletter

Communities, organizations and businesses have specific information needs. Statistics Canada's Indigenous Liaison Program is dedicated to serving you with this newsletter, as well as with ongoing learning and sharing activities.

Learning Corner

Census learning centre

Once every five years, the Census of Population provides a detailed and comprehensive statistical portrait of Canada that is vital to our country. It is the primary source of sociodemographic data for specific population groups such as lone-parent families, Indigenous peoples, immigrants, seniors and language groups.

In order to help users of census products to better understand the various Census of Population concepts, Statistics Canada has developed a series of short videos. These videos are a reference source for users who are new to census concepts or those who have some experience with these concepts, but may need a refresher or would like to expand their knowledge.

Please visit the Statistics Canada website at [Census learning centre \(statcan.gc.ca\)](https://www.statcan.gc.ca) to view the videos.

Did You Know?

New Feature – Census Profile, 2021 Census of Population

Did you know that you can now view up to five 2021 Census of Population profiles at one time? Yes, you can and here's how.

Step 1

- Go to the Statistics Canada website at www.statcan.gc.ca.

Step 2

- A language page will pop up. Select the official language of choice.

Step 3

- When the home page opens, hover the cursor over "**Census**" in the blue ribbon near the top of the page. A drop-down menu will appear. Select "**Census of Population**".

Step 4

- On the **Census of Population** page, click on "**Census data**"
- Under **Data products, 2021 Census**, scroll down and click on "**Census Profile**".

Step 5

- On the page, **Census Profile, 2021 Census of Population**, you can select a profile by place name, postal code or geographic code or scroll down and use **Browse a list** and search for a profile by province or territory and then census subdivision using the alphabetical index.
- Click on the place name you are interested in and a **Profile table** page will appear with the 2021 Census data for the census subdivision you selected. If you only want to view one Census subdivision, you are done. If you want to add more, proceed to step 6.

Questions or Comments?

Please contact one of the Indigenous Liaison Advisors in your area as listed above.

Help us spread the word

If you know an organization or person that may benefit from what this newsletter has to offer, please pass it on or put them in contact with us.

[Employment by Indigenous group and occupation](#)

In 2021, 86,900 Indigenous Canadians were working in occupations in education, law and social, community and government services.

Source: Statistics Canada, Table 14-10-0104-01 Employment by Indigenous group and occupation (x 1,000)

[Indigenous population in Canada – Projections to 2041](#)

The **median age** of the Indigenous identity population is projected to be between 38.2 and 38.4 years in 2041, up from 29.1 years in 2016.

In comparison, the median age of the non-Indigenous population is projected to increase from 41.4 to 44.7 years over the same period.!

Step 6

- Once the **Profile table** loads, you will see two blue bars across the page
- Click on the blue bar labelled, “**Add a geography**” and a search dialogue box will appear
- Type in the name of the Census subdivision you wish to add and a list of closely matching profiles will appear
- Select the profile you wish to add. You can repeat this process up to three more times to create a data table that compares five Census subdivisions at one time!

NOTE:

The data table can be downloaded to your computer for use at your leisure. Downloading in CSV file format will allow you to use the data table in Excel.

Census profile tables can be large, even for small Census subdivisions. If you don’t need to use all the data variables, you can filter variables by clicking “**Add or remove data**” in the second blue bar on the Profile table page. A dialogue box will appear and you can remove variables that you are not planning to use. The other option can be to download the entire data table as a master file and use the Hide and Filter options in Excel.

We hope you will find this new feature useful. Feel free to contact an Indigenous Liaison Advisor in your region if you require assistance. We are here to help.

Canadian Survey on Disability (CSD)

On June 3, 2022, Statistics Canada invited 54,000 survey respondents to complete the 2022 Canadian Survey on Disability (CSD). The CSD provides important data on the lived experiences, unique challenges and barriers faced by persons whose everyday activities may be limited because of a long-term condition or health-related problem.

*Your experience.
Your voice.
Your needs.*

Canadian Survey on Disability

Statistics Canada / Statistique Canada

Canada

The Canadian Survey on Disability (CSD) is currently being conducted by Statistics Canada and is repeated every 5 years following the Census of Population.

The CSD is a nation-wide survey that provides information about Canadian youth and adults whose everyday activities are limited due to a long-term condition or health-related problem.

The survey collects information on a range of disability types and their severity with questions related to health, employment and education. For 2022, content has been expanded to include several new themes including food security, social isolation, accessibility barriers, homelessness, gender diversity, sexual orientation, cannabis use and COVID-19.

Some participants located in Nunavut may also receive an in-person visit from a Statistics Canada representative.
